EDUCATION

The Assam Kaziranga University

Bachelor of Technology in Computer Science and Engineering

Aug 2023 – Aug 2027

Jorhat, Assam

- **CGPA: 8.89**

SKILLS

Programming Languages : Java, JavaScript, SQL

Web Technologies : CSS, HTML, React.js, Node.js

API : REST API, Postman

Cloud : Basic Cloud Computing, Docker (Basic)

Tools : GitHub, Power BI (Basic), Colab

Certifications and Achievement

Full Stack Web Development - IBM Skill Build

Artificial Intelligence Fundamental IBM Skill Build

Docker Essentials - infosys Springboard

Selected as a contributor to open-source community through GirlScript Summer of Code 2025

EXPERIENCE

Edunet Foundation | Microsoft Initiative | AICTE

April 2025 – May 2025

AI intern

Virtual

- Built and deployed an AI-powered medical chatbot using DeepSeek and Streamlit to suggest medicines and treatments based on user-reported symptoms.
- Gained hands-on experience in Streamlit app development, prompt engineering, and debugging AI-driven applications.

Edunet Foundation | IBM Skill-build | AICTE

June 2025 – July 2025

AI/ML Intern

Virtual

- Built and deployed an ML salary prediction system using Logistic Regression and Streamlit, trained on real-world Kaggle datasets.
- Cleaned and preprocessed data using Python in Google Colab to improve model performance.

Assam Power Generation Corporation LTD (APGCL)

Dec 2025 – Dec 2025

Intern

Offline

- Gained hands-on experience in Linux fundamentals, computer networking, and SAP S/4HANA ERP systems during the internship.

PROJECTS

Shiksha

- Developed a full-stack gamified learning platform using HTML, CSS, JavaScript, Bootstrap, and PostgreSQL to simplify STEM concepts.
- Designed interactive games and visual modules to improve student engagement and learning outcomes.

3D Learning Website

- Students often struggle to understand complex subjects due to a lack of visual and interactive learning resources.
- Developed a **3D learning website** featuring **immersive 3D models and animations** for subjects like **medical science and space exploration**, making learning more engaging and easier to understand.

DRbot

- Developed an AI-powered medical chatbot using Python, Machine Learning, and Streamlit for symptom-based guidance.
- Implemented data preprocessing and model training using Kaggle datasets to improve prediction accuracy
